

The Craft of Doormaking

A collection of composite doors individually designed
by master craftsmen covering traditional styles right
through to the ultra-modern.

*Install the door
you will love.*

Why Virtuoso.

Virtuoso Doors has always been a byword for quality, service and reliability, and whilst it operates independently, being part of a bigger fenestration group has enabled us to develop to where we are today.

In today's modern world, exterior doors, whether a front or back door, need to stand out for being more than just a means to enter and leave a building. A Virtuoso door offers security, interior warmth, and resilience – with beauty. Cutting-edge precision engineering and expertise deliver a door with incredible accuracy, stunning detailing, and unrivalled quality.

We have one of the largest composite door ranges available, with colour options to suit any taste, for any door and on any home. With more than 80 doors complemented by different configurations of glass, door furniture, styles and frames, there are over 80,000 combinations to choose from. Once you've made your choice, simply send your completed design – it couldn't be easier. Just tap into our handy Virtuoso postcode search tool to find your nearest available Stockist or Installer and they'll take it from there. And with the support of our expert sales, technical and customer service teams, and it's easy to see why Virtuoso is the installers' choice.

**It's Crafted
Precision, and it's
built into every
door we make.**

A combination of technical and human excellence.

Virtuoso Doors manufactures high-end Glass Reinforced Plastic (GRP) Composite Doors and has grown with a reputation for quality born out of experience and the excellence of our products.

Operating from our 120,000 sq. ft. state-of-the-art manufacturing facility in Gateshead, with nationwide distribution and a sales team serving the whole of the UK, Virtuoso has grown into one of the industry's largest and most respected manufacturers.

Our automated paint line allows for a greater choice of custom colours resulting in a flawless finish. And a new lift system enables speed of manufacture, helping you take delivery of your beautiful new door sooner rather than later.

A door you can rely on.

Each door is made to measure and has a rigid subframe, thermally efficient foam-filled core, impact resistant GRP outer skin, a Yale multipoint locking system, and a high-security cylinder with anti-snap, anti-bump, anti-pick, and anti-drill technology.

With a wide range of styles on offer, choosing a pull bar handle or heritage style escutcheon for a contemporary look rather than a traditional lever handle means your door will benefit from a Yale Lockmaster Auto Engage multi-point locking system, for built in security and added peace of mind.

Our doors offer a truly appealing finish for the entrance of the most beautiful homes, with a high-definition woodgrain-effect 5mm GRP outer skin which will look striking for years to come. Our doors deliver the all-important kerb appeal with minimal maintenance requirements, whilst providing advanced protection from outside noise and, with advanced thermal technology built into a foam-filled core, retains heat and keeps cold out, for a more cost-efficient home. With thermally toughened glazing, Secured by Design and BSI BS 8529/PAS24 approval, your customers' doors will have the style they want with the security they need. And every door is compliant in line with Approved Document Q for new build and the new Building Regulations Approved Document L for Thermal and Energy efficiency.

Composite Construction.

Even more reassuring, we've also added a strengthening bar down the leading edge; the Virtuoso Doors aluminium 'U' rail. It not only adds strength but helps prevent bowing in extreme temperature situations and helping to negate the effects of thermal expansion.

Close a Virtuoso door to the reassuring sound of a 'thump' rather than a rattle. Every screw has been engineered to fit its equally engineered component part precisely. Every core is tested for the highest thermal standard. Each-and-every Glass Reinforced Plastic outer skin is scrutinised for blemishes and tested to withstand extreme weather and temperature.

Impeccably detailed woodgrain texture and ultra-modern aluminium-effect, non-woodgrain finish provide timeless authenticity. Triple glazed units offer even better insulation. And virtually-air-tight twin seals contribute to heat retention, whilst keeping draughts where they belong – outside!

1. Laminated Veneer Lumber (LVL)
2. PU Insulated Foamcore
3. 5mm Glass Reinforced Plastic (GRP) coating
4. Aluminium U rail
5. Polyvinyl chloride (PVC) Composite Rail

Impeccable quality doors that don't cost the earth.

At Virtuoso we believe that beautiful doors shouldn't mean having to compromise on sustainability. In a continued effort to improve our environmental impact we're making big changes, so you can enjoy the peace of mind having greener doors can bring – both inside and out.

- We recycle all cardboard which comes into the factory
- We recycle all plastic hinge sleeves which arrive in the factory
- We recycle all plastic packaging from the profile stillages, slabs and other items
- We have reduced the amount of general waste going to landfill by 40%
- We are transforming the factory lighting to make us more energy efficient

Safe and secure.

As would-be thieves find ever-more diverse ways of gaining access to a building, it's more important than ever to install a door with impeccable security credentials. Which is why our sophisticated solutions are tried, tested, and tested again to ensure access is as difficult and almost impossible – as possible.

The strength of our doors starts at the core. A multi-layered, engineered foam-filled slab that can take the brunt of a sledgehammer – then made even stronger incorporating an aluminium 'U' rail.

A super-resilient and high-impact resistant 5mm outer Glass Reinforced Plastic skin adds yet more strength, whilst our range of multi-point locking systems are approved by BSI security standards and Secured by Design – the police-preferred specification for ultimate peace of mind for your customers. And for you.

WHY YALE MANTIS?

Yale's Mantis 4 door lock offers the best in strength and durability for all types of doors. Designed and manufactured in the UK, its unique hook and linear bolt lock points ensure the ultimate in security for our doors. It also works seamlessly with both our single and French door applications.

Yale Mantis 4 Features

Auxiliary units

- Mantis 4's unique double hook and linear triple bolt unit and pre-compression rollers are cleverly positioned to assist with PAS24: 2016 test accreditation
- Unique hook and linear bolt lock points
- Pre-compression rollers

Centre unit

- Strengthened centre case offering enhanced security for added peace of mind
- Reversible latch
- The easy-to-use push-in latch snib feature has been designed specifically to prevent accidental lock outs
- PZ92 centre case

Faceplate

- 430 Stainless Steel
- 20mm faceplate
- Range includes square and radius ends
- Yale and Mantis faceplate branding

WHY YALE LOCKMASTER AUTO ENGAGE?

For our pull-bar doors, we use an automatic slam-shut locking system. One which complements the attention to detail and superior quality of our doors. The Yale Lockmaster Auto Engage.

Yale Lockmaster Auto Engage multi-point locking system locks automatically as soon as the door is closed. Superbly engineered, the Yale Auto Engage locking system is approved by the Police 'Secured by Design' security initiative – an essential requirement of the Association of British insurers.

The Yale Lockmaster Auto Engage automatic slam-shut system enables you to close the door behind you on entering your home, providing immediate full security and whilst reducing the risk of anyone trying to enter immediately behind you. As soon as the door is closed, automatic locking takes place without the need to lift a handle. The locked door can then be open internally by depressing a handle or operating a thumb-turn cylinder. Entrance can only be gained by the use of a key. Complimentary to the Yale Lockmaster Auto Engage is the Platinum 3 Star Euro Profile Cylinder.

Protection at the back as well as the front

At Virtuoso Doors, we don't simply make doors – we understand why we make doors. For aesthetics, for strength, for weather, for noise reduction, heat retention and security. Which means we also understand all those things apply to any door. Front or back.

Aside from the front door, the back door in particular shouldn't be overlooked – because back doors are more attractive to burglars. Our back doors are as beautifully crafted as our front doors. They're not cut-to-fit, which can make them weaker, but made to measure, perfectly aligning to the security components that make a Virtuoso door secure.

Just because it's at the back, doesn't mean it's at the back of our mind.

Yale and Ultion Cylinders

Our multipoint locking mechanisms are complemented by either a Yale Platinum 3 Star Euro Profile Cylinder or Ultion 'Secured by Design' High Security Cylinder. Both have peace-of-mind anti-snap, anti-pick, and anti-drill technology and comes with a compensation guarantee should you experience a break-in by means of snapping one of our locks.

Yale cylinders: £1000 in compensation

(available with key or thumbturn options)

Ultion cylinders: £2000 in compensation

(available with key, thumbturn, and one key fits all* options)

Third party confidence.

Today, you want proof when it comes to the construction quality and security of the doors you're choosing for your home. After all, it has to stand up to extreme weather, wear and tear and forced entry. That's why our doors are constructed to satisfy the Secured by Design* accreditation (the official police security initiative) and BS 8529 for quality.

And when it comes to choosing hardware and glazing, there are no compromises – our designs allow for increased security of your door depending on which type you choose.

*Secured by Design doors must be ordered with laminated glass to comply.

The Green Door

Due to the precise detail we go to in crafting our doors, they are A-Rated by independent testers, meaning our doors perform as they should – keeping in the warmth, keeping out draughts and cold.

Part L Compliant

All our composite doors are manufactured to the highest quality standard making them more thermally efficient by design and achieves the new Part L Building Regulations for England as set by the government for both new refurbishment and new build projects.

All refurbishment projects need to achieve an 'A' rating whilst new-build project will be assessed by its compliance to 'U' Value ratings. The warm foam-filled core allows our doors to have a significantly better energy rating than any other option and our range achieves the minimum Energy rating of B and can be increased to an A rating depending on glass choice.

Carefully crafted specialist glass designs are supplied with a Warm Edge / Argon Filled / Soft Coat in a double or triple glazed solution. All patterned and decorative glass is triple glazed. Virtuoso doors can achieve an Energy Rating A and a 'U' Value between 1.2 and 1.4. All doors comply using the Door Energy Ratings.

Threshold Options.

A Virtuoso door isn't complete without a threshold. You can choose from Standard or Low PVC but we also offer Low or Part M Low Aluminium threshold options. All Aluminium options are available in either silver or gold.

For customers who require additional assistance to enter their home, our Part M version has a ramp built into the design enabling wheelchair access. This will provide the confidence and flexibility they need.

The removable threshold

Due to their position within the entrance of your home, the threshold is vulnerable to damage. That's why our thresholds are designed to be easily removed – without the need to remove the door and door frame. So, if you're having additional building work or having heavy goods delivered to your home, you can remove the threshold to ensure it's protected from damage until work has been completed. Then, you simply refit it – looking as beautiful as the day it was first installed.

Handy hints for the Ultimate door.

The right frame

Do you prefer PVCu or Aluminium? We have two profiles in PVCu, Rehau and Duraflex; both slightly different in style but both exceptionally high quality and can be white or colour-matched. Definitely worth considering when choosing your door style and colour. Our aluminium range of frames provide exceptional thermal performance whilst delivering a sleek contemporary look. Our Virtu-AL range look particularly spectacular with an aluminium frame.

Hinge and handle location

It sounds obvious, but it's worth noting how you want to open and close your door. This will dictate which side to locate your handles/keylocks and hinges.

Sidelights

Your home may have an entrance that's wider than the door and therefore you may need to include sidelights or side panels to your design. Depending on the opening and the accessibility to your hallway, you can have sidelights to the right of your door, the left of your door, or either side.

Design a Door.

A Virtuoso door is a beautiful addition to your property, but with our 'design-a-door' tool, you can choose the style, colour and hardware to create a Virtuoso door that's uniquely yours. Simply visit virtuoso-doors.co.uk and select the design-a-door portal, you'll discover a multitude of possibilities in just a few clicks.

The process is easy too. Once the door has been configured, simply email it to your Installer for a quote and ordering. If you don't have an Installer, simply visit the **Virtuoso Installer/Stockist** postcode search tool at virtuoso-doors.co.uk to find a professional in your area.

1. Choose your door style (Pages 22 - 65)

Select from our extensive range of door styles. Use our ranges and style guide to help find the perfect door.

Need a sidelight as well? We have a range to match the door style you choose.

Traditional Cottage Contemporary Virtu-AL Stable Doors French Doors

2. Choose your frame

Match your new door frame to your windows with a choice of PVCu or Aluminium outer frames.

PVCu Frame Aluminium Frame

3. Choose your colour (Pages 18 - 19)

Choose from 7 standard colours, 14 superior colours and any RAL colour. Our doors can be personalised with any RAL colour in our state-of-the-art paint studio.

4. Choose your glass (Pages 70 - 77)

Select bevelled, leaded, frosted or plain from the glazing chart on pages 70-77. Our door style pages showcase the best-suited combinations, but if the glass shown isn't with your chosen door style, simply ask us and we'll let you know if it's available.

Bevelled Leaded Frosted Plain

5. Choose your hardware (Pages 66 - 69)

Select your choice of handle, letterplate and door knocker in 6 finishes. Choose the Contemporary range for an ultra-modern finish, the Traditional range to complete the cottage look, or our new 'Sweet' range of hardware, for something a little bit special – and even a touch of Rose Gold.

Enhance your home with style.

As the UK's favourite door brand, Virtuoso naturally offers one of the largest ranges in the market.

This is where unrivalled quality meets unrivalled choice – every element is considered, meaning your design can match your exact requirements. Virtuoso enables a world of personalisation and possibility, from frame and colour options, to hardware, glass and style.

■ You can have any door in any colour. ■ More glass designs are available than pictured in these pages.

Matched colours. Unmatched choice.

Standard colours

Superior colours

Colours are as accurate as the printing process allows. Due to the hand painting and staining process, we can't guarantee an exact colour match between the door and the external door frame.

Each Virtuoso door is delivered with a deep, lustrous finish that's anti-fade and will look sensational for years to come.

If you have a particular favourite colour that's not available in our vast standard colour range, we can personalise your door with a colour mixed from our RAL service. We can even match your door to your garage door and gutters to give your home a completely seamless aesthetic. We can also match the colour of your door with the frame, and all are available in standard lead times. Just let us know the colour and we'll match it in our state-of-the-art paint studio.

Delicate. Complex. Minimalist.

Welcome to the glass collection

A Virtuoso door has many virtues, and none more personal to your customers as individuality.

Aside from the door itself, the choice of colour, either woodgrain or aluminium – glass can make all the difference. Our glazed doors come with double or triple glazed glass options, are precisely hand-assembled in our workshop and include lead, bevels, sandblasted glass, coloured glass, and resin bevels.

Triple Glazed

Hand-assembled triple glazed units provide superior heat and sound insulation for your door.

Double Glazed*

Our double glazed units are a stylish way to flood your home with light. Personalise with your choice of backing glass.

Sandblast

A sleek, frosted glass effect perfect for contemporary or traditional doors.

Georgian Grill*

The Georgian Grill sits on both sides of the door. Choose a backing glass to complete the look.

Glass Bevels*

A combination of hand-crafted glass bevels and lead added to a backing glass of your choice.

Glass Tiles

These designs incorporate kiln fused glass tiles or sparkling bevels on a sandblasted pane.

Lead & Film*

This hand-applied technique replicates the look of stained glass windows.

Resin Bevels

We use the latest technology to create complex and delicate resin designs not possible with glass.

- All pattern names (e.g. Everglade™) are a trademark of Pilkington plc.
- All pattern images are the copyright© of Pilkington plc and are reproduced by permission of Pilkington plc.
- Lead is a natural product, which when exposed to the environment will undergo atmospheric transformations such as oxidation. This is perfectly natural and will settle down to take on a natural weathered lead appearance.
- All glazing styles depicted with an asterisk (*) require a backing glass.

The Traditional Statement.

Period properties with character call for authentic style. Picture strong cues back in time, but with a modern construction that stands the test of time. Our traditional Collection brings the past to life, featuring authentic window apertures, panel detailing and an exquisitely detailed woodgrain finish.

The Ultra-chic Aluminium Statement.

Aluminium. A material synonymous with the most prestigious homes.

Our Virtu-AL collection has a stylish aluminium textured architectural appearance that's virtually indistinguishable from the real thing, whilst benefiting from the highest levels of performance and security you'd expect from a Virtuoso composite door.

The hardware finishing touch.

Standard Hardware

Suddenly, everything comes together. Something as small and simple as an escutcheon can make all the difference. There's certainly nothing standard about our Standard Hardware Range.

Made from the most robust materials and engineered handles for the smoothest of operation – opening and closing your new door effortlessly every time. From the traditional and rustic to the stylish contemporary, a handle, a letterplate and a door pull from our Standard Range complete your customer's door – perfectly.

So, when your customers pull that door shut, it'll sound, and feel, just right.

Superior Letterplates

High security letterplates come complete with anti-snap flap, internally fixed screws and they're fully weather sealed.

* Stainless steel hardware comes with a comprehensive anti-corrosion guarantee

The hardware finishing touch.

The Traditional Range

A traditional antique black finish makes this the perfect range for the traditional cottage-style door.

The Contemporary Range

High quality stainless steel and chrome hardware options complete the ultra-modern look.

The Sweet Range

We've also offered a new range of premium door furniture to complete the look, the 'Sweet' Range. Stylishly simple, exquisitely designed, the curved principle within each component in the 'Sweet' Range provides a lasting aesthetic. Three colour options of Rose Gold, Stainless Steel and Chrome, a 20-year Guarantee* and tested against corrosion thirty times more than the required flagship EN 1906:2012 Corrosion Standard.

Sweet by Virtuoso

20 year Guarantee*

The Virtuoso Doors 'Sweet' range comes in three beautiful finishes and are guaranteed not to rust for 20 years, or we'll replace the product free of charge as long as it's been cared for as per our manufacturer's maintenance guide. To activate the guarantee, simply register your details within 28 days of installation. For more information, scan the QR code below or visit <https://www.sweet-doors.co.uk/virtuoso/>

* Subject to registration with Sweet by the homeowners.

And for extra peace of mind, you can request high-security Ultion Cylinders on all doors you choose, combined with code-supplied keys, which means you have the security you need with the convenience of one-key-fits-all. Simply inform your Installer during the ordering process.

So, when you pull that door shut, it'll sound, and feel, just right.

* Stainless steel hardware comes with a comprehensive anti-corrosion guarantee

The right glass for your door.

Glazing adds security, style, elegance and privacy. See which glass is specially made to complement our doors. From obscure, leaded and coloured, to bevelled, sandblasted, double glazed or triple glazed options. And even gas-filled units for added thermal and acoustic performance. It's also worth remembering that, depending on the glass you choose, glass can ensure your door has the Secured by Design police-endorsed accreditation.
